Phung Minh Chien

Software Developer

0965631549 chienphung09102003@gmail.com https://github.com/dfa8336hgjz Ha Noi, Vietnam

OBJECTIVE

I'm a software developer with 9 months of experience, skilled in Python, Java, C++, and JavaScript, with a strong focus on Object-Oriented Programming. I'm looking to improve my coding skills, work on challenging projects, and grow as a developer. I am looking for opportunities to deepen my understanding of backend and full-stack development while contributing to meaningful projects.

EDUCATION

Hanoi University of Science and Technology (HUST) 2021 - Now

Major: Digital Communication and Multimedia Engineering

GPA: 3.45 / 4.00
Vstep: 785

SKILLS

Programming language:	Java, Python, C/C++ , Javascript, Typescript, C# (Unity)
Frameworks, Libraries & Platforms:	Springboot, ReactJS, Odoo, FastAPI, Qt, ReactNative, OpenCV, Langchain
Databases & Storage:	MySQL, SQLite, Redis, Weaviate, Milvus
Tools:	Git, GitHub, GitLab, Kibana, IntelliJ, VsCode
Software Architecture & Design Patterns:	MVC, RESTful APIs
Soft skills	Have teamwork and collaboration skills; Good at English reading and listening comprehension; Can write and speak English at a basic level

WORK EXPERIENCE

VPBank Sep 2025 - Now

Fullstack developer

- Fullstack Developer with experience in building and maintaining enterprise banking applications using ReactJS and Java Spring Boot.
- Experienced in integrating banking and card management related systems, including Way4, T24, eSignHub, ensuring secure and reliable data exchange across enterprise environments.
- Worked closely with business analysts, product owners, and operation teams to translate business requirements into scalable technical solutions.
- Specialized in Java Spring Boot microservice architecture, focusing on clean code, scalability, and performance.
- Experienced in designing RESTful APIs and integrating services within enterprise platforms. Skilled in troubleshooting and log tracing using Kibana to diagnose issues in distributed environments.
- Worked with IBM API Connect for API management and gateway integration. Familiar with GitLab and Jemkins for source control, CI/CD pipelines, and collaborative development workflows.

NGS Holdings Oct 2024 - Sep 2025

Software Developer - Video Management System

- Technical stack: Qt (Python, C++), QML
- Develop the user interface for the VMS (Video Management System) software using Qt Python, C++, and QML.
- Research and implement mapping tasks using OSM (OpenStreetMap) and ArcGIS.
- Communicate with the backend and integrate with the RESTful API system.
- Store, manage, and update data from the API using a local database (SQLite) and WebSocket.

Freelance Mar 2025 - Jun 2025

Fullstack Developer - Odoo-based application for garment process management

- Technical stack: Odoo, OWL, PostgreSQL, Docker
- Implement a management system with core modules: Sample, Order, Production, Inventory
- Deploye a flexible permission mechanism based on Odoo's built-in platform
- Customize the frontend using OWL with JS, XML, and CSS
- Utilize Odoo's ORM to implement, connect, and manage the system's database tables using PostgreSQL
- Packaged the source code with Docker for delivering to the server and deployment .

Freelance Oct 2023 - Apr 2024

Backend Developer - Website for interconnecting medical examination results for hospitals in Hai Duong

- Technical stack: Typescripts, MySQL
- Engage in a project under the supervision of teacher
- Design MySQL database based on the requirements during the project development process
- Use Typescript to develop REST APIs according to the system design
- Use Postman to verify and test APIs functionality

PERSONAL PROJECTS

VPBank hackathon Project: 6-jar management application Jun 2025 - July 2025

Frontend Developer

- Technical stack: Typescripts, React Native
- Design and implement UI for the application
- Use Postman to verify and connect APIs to frontend functionality

CAIN: Chatbot for documents Sep 2024 - Nov 2024

Fullstack Developer

- Technical stack: ReactJS, FastAPI, Redis, MySQL, Weaviate
- Design MySQL database based on the requirements during the project development process
- Develop a chatbot core using LangChain and Gemini API, integrating RAG for enhanced responses.
- Design and implement a web interface using React.js.
- Design and implement a RESTful API backend with FastAPI.
